

3D Creation and Conversion

New York - Moscow

2011

Based on extensive expertise in 3 Dimensional graphic design and development of 3D content conversion software together with Philips 3D Solution we have achieved an unparalleled quality results which make us different from any competitors.

2D to 3D Stereoscopic conversion of imagery, using our exclusively owned stereoscopic conversion technology, well versed techniques and procedures, any live action or digital media can be converted.

Our stereoscopic compositors and 3D artists can create many enhancements that would change an otherwise boring 3D film, into a 3D visual treat for anyone to enjoy.

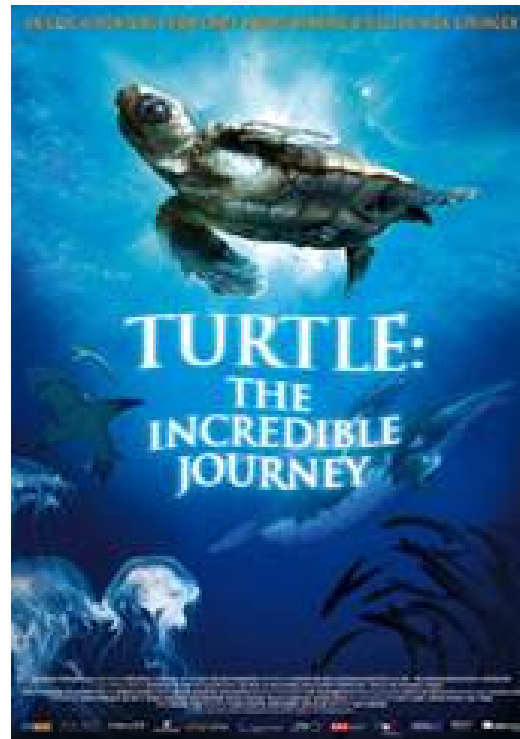

Our talented team with over 300 artists and pipeline are geared toward emulating the look of stereoscopic cinematography through the economical and timely process. Our artistic and management team have years of experience in Film, Television and Commercial production.

Our cost effective technology will guarantee you savings of up to **50 %** on 2D to 3D conversion cost, keeping the highest industry quality standards. Within 90 days full motion picture (i.e.. 70 min) can be converted and ready for screenings.

Completed Projects

Space Dogs 3D

Turtle, The Incredible Journey 3D (BBC project)

Kings Rescue 3D
